ABOUT

Javascript Engineer dedicated to cleanliness and efficiency while producing meaningful code. Growing up with a strong passion for music, I've funneled my creativity into composing succinct and organized web applications. Flexible, resourceful and a strong leader, I'm committed to building completed projects to the fullest of my capabilities while helping others along the way.

EXPERIENCE

SOFTWARE ENGINEER

Vody | Dec 2016 - present

Native Engineer for iOS, Android and
TvOS/FireTV apps using React Native

- Intimate knowledge with React Native. This includes troubleshooting performance issues surrounding large complex lists without performance drops, and embedding animations and videos for phone and television applications.
- Oversight of higher level library and architecture decisions include decisions surrounding linting standards, redux middle-ware, and other various third party modules needed.

FULL STACK WEB DEVELOPER

The Fresh | Feb 2016 - Dec 2016

Developer for numerous projects

- Created architecture for project's code base
- Maintained front end pixel perfect design specifications
- Integrated cutting edge javascript libraries with traditional relational database backends

MENTOR

Dev Bootcamp | Oct 2015 - present

Guide students through learning web development

- Offer insight and experience for best practices and methodologies in software design and development
- Answer students questions pertaining to developing web applications

SKILLS

LANGUAGES: Ruby, Javascript, UNIX/LINUX
Shell Script

WEB FRAMEWORKS: Rails, Sinatra, Gulp,
Webpack, NPM, Shopify

JAVASCRIPT: React, React-Native, Redux,
Node.js, Babel/ES6, JQuery, Yarn

FRONT END: HTML5, CSS3, SCSS, SASS,
Foundation, Materialize, Bootstrap, Liquid

METHODOLOGIES: Object-Oriented
Programming, Functional Programming, Test
Driven Development, Behavior Driven
Development, Version Control using Git,
RESTful Design, Agile Workflow

TESTING FRAMEWORKS: RSpec, Mocha, Chai,
Expect.js, Enzyme, Jest, Circle CI, SimpleCov

DATABASES: ActiveRecord, SQL(PostgreSQL,
SQLite, MySQL), MongoDB, Firebase

EDUCATION

DEV BOOTCAMP

19 week intensive program focusing on the skill sets to become a full stack developer

BERKLEE SCHOOL OF MUSIC

Music Production and Engineering
